

NON-ABRASIVE CLEANING DRY ICE BLASTING

Dry ice blasting is a new form of non-abrasive blasting for industrial cleaning applications. Dry ice blasting uses compressed air with high velocity nozzles and pelletized dry ice for safe, less abrasive surface cleaning.

CEE KAY SUPPLY IS THE ONLY AUTHORIZED COLDJET MANUFACTURERS REP IN THE STATE OF MISSOURI!

USES & BENEFITS

- Faster and more thorough cleaning.
- Non-flammable, non-abrasive, non-conductive, non-toxic removal methods.
- No clean-up of chemicals and solvents, dry ice simply sublimates into the atmosphere.
- Equipment can be cleaned in place requiring no disassembly.
- Thermal-kinetic removal effect is ideally suited for the aerospace and food industries.
- Lower abrasion is perfectly suited for mold removal and remediation and plastic molding removal.
- Approved by the EPA, FDA and USDA

INDUSTRIES & APPLICATIONS

- Food and Beverage Processing
- Roof & Fin Fan Cleaning
- Historical Restoration
- Printing & Plating
- Weld Preparation & slag removal
- Aerospace
- Fire & Smoke Restoration
- Marine
- Rubber
- Utilities & Nuclear
- Automotive
- Foundry
- Mass Transit
- Wood, Brick and Plastic
- Pharmaceutical Equipment
